# 1. Study Overview

---

## 1.1 Background & Aims

The COVID-19 Social Study commenced on 21<sup>st</sup> March 2020 in response to the outbreak of the novel coronavirus disease (COVID-19). It is a large scale longitudinal panel study of adults aged 18 and over living in the UK. The study was established with five core aims:

1. To understand the psychological and social impact of Covid-19
2. To map how the psychosocial impact evolves over time as social distancing and lockdown measures were introduced and relaxed
3. To ascertain which groups were at greatest risk of adverse effects
4. To explore the interaction between psychosocial impact and adherence to healthy and protective behaviours
5. To identify protective activities during isolation that could buffer against adverse effects

Participants provide an email address on first enrolling and complete an online questionnaire. They are then automatically re-contacted at this address every week for follow-up questionnaires in order to explore trajectories over time. Data are anonymised prior to analysis.

The study ask baseline questions on the following:

- Demographics including year of birth, sex, ethnicity, relationship status, country of dwelling, urban/rural dwelling, type of accommodation, housing tenure, number of adults and children in the household, household income, education, employment status, pet ownership, and personality
- Health and behaviours including pre-existing long-term physical health conditions, diagnosed mental health conditions, pregnancy, smoking, alcohol consumption, physical activity, caring responsibilities, usual social behaviours, and social network size

It also asks repeated questions every week on the following:

- Covid-19 status including whether the respondent has had Covid-19, whether they have come into likely contact with Covid-19, current isolation status and motivations for isolation, length of isolation, length of time not leaving the home, length of time not contacting others, trust in government, trust in the health service, adherence to health advice, and experience of adverse events due to Covid-19 (including severe illness within the family, bereavement, redundancy, or financial difficulties)
- Mental health including wellbeing, depression, anxiety, which factors were causing stress, sleep quality, loneliness, social isolation, and changes in health behaviours such as smoking, drinking and exercise
- How people are spending their time whilst in isolation, including over questions on working, functional household activities, care and schooling of any children in the household, hobbies, and relaxation

Certain weeks of the study also include one-off modules on topics including:

- Volunteering behaviours
- Control, frustrations and expectations
- Coping style
- Fear of COVID-19
- Resilience
- Arts and creative engagement
- Life events
- Optimism
- Locus of control
- Emotional intelligence
- Weight
- Gambling behaviours
- Mental health diagnosis
- Use of financial support
- Region
- Faith and religion
- Relationship
- Neighbourhood
- Healthcare
- Lockdown holiday
- Discrimination
- Life changes
- End of July (financial support, volunteering, art, gambling & mental health)

Throughout the pandemic in the UK, the study has provided weekly research reports and updates to the Cabinet Office, other departments within government, Public Health England and the World Health Organisation as well as making results publicly available on the study website.

This User Guide provides detailed information pertaining to the UCL COVID-19 Social Study data.

## 1.2 Funding

The COVID-19 Social Study is funded by the Nuffield Foundation [WEL/FR-000022583] and the Wellcome Trust [221400/Z/20/Z] and also receives supplementary support from UK Research and Innovation through the MARCH Mental Health Research Network [ES/S002588/1].

## 1.3 Ethical clearance

Ethical approval for the study was granted by the UCL Research Ethics Committee [12467/005] and the study is fully GDPR compliant, running through a REDCap secure software programme within a data safe haven.

### 1.4 Patient and Public Involvement

The research questions in the UCL COVID-19 Social Study built on patient and public involvement as part of the UKRI MARCH Mental Health Research Network, which focuses on social, cultural and community engagement and mental health. This highlighted priority research questions and measures for this study. Patients and the public were additionally involved in the recruitment of participants to the study and are actively involved in plans for the dissemination of findings from the study.

### 1.5 Contact details

Any queries related to the study should be sent to: [covid19-study@ucl.ac.uk](mailto:covid19-study@ucl.ac.uk)

# Sample

---

## 2.1 Sample design

The study is not random and therefore is not representative of the UK population. But it does contain a well-stratified sample that was recruited using three primary approaches.

1. First, snowballing was used, including promoting the study through existing networks and mailing lists (including large databases of adults who had previously consented to be involved in health research across the UK), print and digital media coverage, and social media. This included advertising the study through databases of adults who had previously consented to be involved in health research (such as UCL BioResource and HealthWise Wales) and through the UKRI Mental Health Research Networks.
2. Second, more targeted recruitment was undertaken focusing on (i) individuals from a low-income background, (ii) individuals with no or few educational qualifications, and (iii) individuals who were unemployed. This was achieved through partnership work with targeted advertising companies and recruitment companies who provided pro-bono support for the study, including Find Out Now, SEO Works, FieldworkHub, and Optimal Workshop. **However, no participants were paid to participate in the study.**
3. Third, the study was promoted via partnerships with third sector organisations to vulnerable groups, including adults with pre-existing mental health conditions, older adults, carers, and people experiencing domestic violence or abuse. This included utilising partnerships from the 1,500-strong membership of the UKRI MARCH Mental Health Research Network.

No proxy interviews were carried out, so the study was not available to individuals without access to the internet.

## 2.2 Study design

The study commenced as a weekly survey, with participants automatically receiving an invitation to the next wave of data collection 7 days following their last completion. All participants received 2 reminders (24 and 48 hours following their initial weekly invitation). If they did not complete following these reminders, they stopped receiving future surveys. But their link to their last reminder remained live so they could return to the study a few days late if they chose. For this reason, date is recommended to be modelled within analyses that look at longitudinal follow-up so as to take account of whether responses were precisely 7 days apart or not.

Following week 22 of the study, the study changed from weekly follow-up to monthly follow-up. In order to still have a spread of responses across the weeks, participants were randomised to receive their first monthly invitation in week 1, 2, 3 or 4 of the month, with subsequent invitations following on 28 days after they completed the survey. We re-approached all participants who had been lost to follow-up but who had not formally unsubscribed from the study to take part, so the sample size increased following this alteration to the study design.

## 2.3 Cleaning

A number of checks on the data were performed, with responses failing these checks being eliminated before any counting of the total sample size took place.

To confirm age eligibility, we asked about age including ages under 18, and excluded any responses from those too young to participate. To confirm country of origin, we similarly asked about country of residence and excluded any outside of the UK.

The system required an email address to be entered and validated before any study material could be provided. This approach was used to bot completion of the study. However, we lack information on how many survey invitations for subsequent weeks were rejected from email accounts (for example due to typographical errors in emails or non-working email accounts). All data were checked for duplicate email addresses, and all duplicates (0.1% of the sample) were removed.

## 2.4 Recruitment rate

Participants could join the study on any date from 21st March onwards (see Figure below). Active recruitment using the techniques described in section 2.1 was continued for the first 8 weeks of the study and then stopped. Date of joining is denoted with the variable 'datepx'. Their first survey completed is denoted as 'wave' 1, with subsequent responses on subsequent weeks being labelled as 'wave' 2, 3 etc. The variable 'wave' was derived from the original variable, 'redcap\_event\_name'.

The week of joining the study is denoted with the variable 'week' derived from the date variable 'datepx'. The baseline week was defined as the first survey week, from 21/03/2020-27/03/2020 (as shown below). Please note that a small number of participants have repeated week values. This is

problematic if using 'xtset' with week. This will be addressed in future cleanings of the dataset, but for the present users are left to decide how to deal with these cases.

Week	Date
1	21/03-27/03/2020
2	28/03-03/04/2020
3	04/04-10/04/2020
4	11/04-17/04/2020
5	18/04-24/04/2020
6	25/04-01/05/2020
7	02/05-08/05/2020
8	09/05-15/05/2020
9	16/05-22/05/2020
10	23/05-29/05/2020
11	30/05-05/06/2020
12	06/06-12/06/2020
13	13/06-19/06/2020
14	20/06-26/06/2020
15	27/06-03/07/2020
16	04/07-10/07/2020
17	11/07-17/07/2020
18	18/07-24/07/2020
19	25/07-31/07/2020
20	01/08-07/08/2020
21	08/08-14/08/2020
22	15/08/20-21/08/20
<b>*Survey switched to monthly follow-up</b>	
23	22/08/20-28/08/20
24	29/08/20-04/09/20
25	05/09/20-11/09/20
26	12/09/20-18/09/20
27	19/09/20-25/09/20
28	26/09/20-02/10/20
29	03/10/20-09/10/20
30	10/10/20-16/10/20
31	17/10/20-23/10/20
32	24/10/20-30/10/20
33	31/10/20-06/11/20
34	07/11/20-13/11/20
35	14/11/20-20/11/20
36	21/11/20-27/11/20
37	28/11/20-04/12/20
38	05/12/20-11/12/20
39	12/12/20-18/12/20
40	19/12/20-25/12/20
41	26/12/20-01/01/21
42	02/01/21-08/01/21
43	09/01/21-15/01/21
44	16/01/21-22/01/21
45	23/01/21-29/01/21

If a participant joined the study later, say in week 4, s/he would commence with 'wave' 1, but in 'week' 4, so would be treated as missing from weeks 1 to 3.

Alternatively, users could also fix the time variable on a specific date, for example the starting point of the study (21/03/2020) or the lockdown (23/03/2020). This can be derived by using the following Stata command:

```
gen day=datepx-mdy(03,21,2020)
or
gen day=datepx-mdy(03,23,2020)
```

## 2.5 Response rate

Out of a total of 98,534 individuals who landed on the consent page for the study, 84,497 consented to take part, and 73,265 commenced the study and provided data at one or more waves.

Data provided is either complete or incomplete. The variable 'date' indicates when survey participants **completed** a survey for a particular wave. It was derived from the time-stamp variables, 'your\_experience\_dur\_v0', 'your\_experience\_dur\_v2' and 'your\_experiences\_2\_timestamp' which were automatically generated by the REDCap system on completion of a survey.

The variable 'date' differs from 'datepx' in that 'datepx' included participants who started a survey for a particular wave but did not complete it. These non-completed surveys are not assigned an official timestamp by REDCap. For 'date' they are listed as '[not completed]' but for 'datepx' missing dates were imputed based on the time stamp for completing the first completing the first part of the questionnaire, or based on the time stamps of previous or later waves assuming that the follow-up was strictly 7 days.

These incomplete cases can be drop by using the following Stata command:

```
drop if date==.
```

As participants joined the study on different days and therefore received weekly invitations to continue participation on different days, surveys were completed across every day of the week from the start of the study. The number of surveys completed on each day (up to 21 August 2020) is shown below:

datepx	Freq.	datepx	Freq.	datepx	Freq.	datepx	Freq.
21-Mar-20	2,474	29-Apr-20	6,471	07-Jun-20	4,108	16-Jul-20	3,930

19-Apr-20	3,330	28-May-20	5,106	06-Jul-20	4,324	14-Aug-20	3,132
20-Apr-20	5,127	29-May-20	4,678	07-Jul-20	3,973	15-Aug-20	2,893
21-Apr-20	6,963	30-May-20	3,774	08-Jul-20	4,176	16-Aug-20	3,364
22-Apr-20	6,742	31-May-20	4,193	09-Jul-20	4,104	17-Aug-20	3,794
23-Apr-20	6,459	01-Jun-20	4,472	10-Jul-20	3,718	18-Aug-20	3,438
24-Apr-20	5,644	02-Jun-20	4,966	11-Jul-20	3,314	19-Aug-20	3,469
25-Apr-20	4,399	03-Jun-20	5,472	12-Jul-20	3,571	20-Aug-20	3,198
26-Apr-20	3,481	04-Jun-20	4,780	13-Jul-20	4,363	21-Aug-20	2,943
27-Apr-20	4,390	05-Jun-20	4,531	14-Jul-20	3,948		
28-Apr-20	6,181	06-Jun-20	3,891	15-Jul-20	3,972		

The study moved to monthly follow-ups after 21<sup>st</sup> August so recruitment was shut and analysis moved from daily to weekly.

## 2.6 Retention rate

The variable 'wave' indicates the sequence of repeated responses for each participant. The baseline response is when 'wave' equals 1. As participants could join the study at any point, the response rate across waves is changing daily while the study is open. **Once study recruitment is complete, we will calculate complete response rates for each wave.**

As of 25 January 2021, the numbers of responses across each wave is as follows. NB the % of participants shown in columns 4 and 5 does not represent a simple retention rate as participants have all joined at different dates across the study period so not everybody has had the 'opportunity' to complete multiple waves of data yet. Each week more participants move through the study from previous weeks, increasing the overall numbers who have maintained study engagement.

<b>Wave</b>	<b>Freq.</b>	<b>% of total Obs.</b>	<b>% of Wave 1 participants</b>	<b>% with Follow-ups</b>
<b>1</b>	72,665	10.64	100.00	80.10
<b>2</b>	58,648	8.59	80.71	87.11
<b>3</b>	50,973	7.46	70.15	89.75
<b>4</b>	45,707	6.69	62.90	91.98
<b>5</b>	41,922	6.14	57.69	92.82
<b>6</b>	39,006	5.71	53.68	93.61
<b>7</b>	36,159	5.29	49.76	95.15
<b>8</b>	35,009	5.13	48.18	95.64
<b>9</b>	33,481	4.9	46.08	96.01
<b>10</b>	32,146	4.71	44.24	96.25
<b>11</b>	30,941	4.53	42.58	96.25
<b>12</b>	29,781	4.36	40.98	95.84
<b>13</b>	28,541	4.18	39.28	95.59
<b>14</b>	27,282	3.99	37.54	93.20
<b>15</b>	25,428	3.72	34.99	90.81
<b>16</b>	23,092	3.38	31.78	90.24
<b>17</b>	20,838	3.05	28.68	87.69
<b>18</b>	18,273	2.68	25.15	80.43
<b>19</b>	14,697	2.15	20.23	69.12
<b>20</b>	10,157	1.49	13.98	63.72
<b>21</b>	6,473	0.95	8.91	27.24
<b>22</b>	1,763	0.26	2.43	--

NB Wave 22 was an incomplete week so participants did not have equal opportunity to participate before the study switched to monthly rather than weekly follow-up. Wave 23 onwards was a monthly wave, consisting of data collected over a period of 4 weeks. As the full sample was re-contacted, the completion rate also increased:

<b>Wave</b>	<b>Freq.</b>	<b>% of total Obs.</b>	<b>% of Wave 23 participants</b>	<b>% with Follow-ups</b>
<b>23</b>	39,452	23.12%	100.00%	85.29%
<b>24</b>	33,648	19.72%	85.29%	91.56%
<b>25</b>	30,807	18.05%	78.09%	92.92%
<b>26</b>	28,626	16.78%	72.56%	94.19%
<b>27</b>	26,964	15.80%	68.35%	In progress
<b>28</b>	11,147	6.53%	In progress	--

The total number of participants providing data during each calendar week is shown below (NB the numbers were correct until 9am on 25 January, 2021, so this week does not have complete data yet).

Date	Week	Freq.
21/03-27/03/2020	1	28,847
28/03-03/04/2020	2	27,853
04/04-10/04/2020	3	38,138
11/04-17/04/2020	4	38,435
18/04-24/04/2020	5	38,477
25/04-01/05/2020	6	36,502
02/05-08/05/2020	7	36,627
09/05-15/05/2020	8	37,546
16/05-22/05/2020	9	35,731
23/05-29/05/2020	10	33,289
30/05-05/06/2020	11	32,189
06/06-12/06/2020	12	31,296
13/06-19/06/2020	13	30,226
20/06-26/06/2020	14	29,153
27/06-03/07/2020	15	28,528
04/07-10/07/2020	16	27,552
11/07-17/07/2020	17	26,730
18/07-24/07/2020	18	25,973
25/07-31/07/2020	19	24,996
01/08-07/08/2020	20	24,521
08/08-14/08/2020	21	23,849

\*NB Following week 22, the study was changed from weekly to monthly follow-up, with participants randomised into whether they completed their surveys in weeks 1, 2, 3 or 4 of each month. This increased the overall sample size still participating in the study but decreased the participants each calendar week.

## 2.7 Participant characteristics

The demographics of study participants across every wave are presented below.

As the study used a nonprobability sampling design, we recommend that all analysis should be conducted on weighted data to compensate for the difference in response probability in the UK population.

The dataset contains a cross-sectional weight variable (w1wgt) for all baseline participants (wave==1). The cross-sectional weighting was implemented by using the Stata user written command 'ebalance'

<sup>1</sup>. The weighted data were matched to population statistics for the following domains:

- Age
- Gender
- Ethnicity
- Education
- Country of living

<https://www.ons.gov.uk/peoplepopulationandcommunity/populationandmigration/populationestimates/datasets/populationestimatesforukenglandandwalesscotlandandnorthernireland>

**Once the study finishes, we will also calculate longitudinal weights to take account of respondents at previous waves who were lost through non-response or withdrawal from the study.**

### 3 Measures

*Note: The survey completion dates might exceed the module time ranges for a small number of participants. This is because participants are allowed to complete half the survey and return a few days later. As such their module data will have been captured within the dates the module was live, but it will not be clear on which date within the week the questions were completed. Data users are encouraged to consider the module questions for these participants as being completed on the last date for the relevant module if including dates within analyses for these variables.*

### 3.1 Study timeline

The study was launched with an initial questionnaire which included a slightly reduced number of the full study questions. In the weeks following, the full list of questions was added and several questions underwent minor clarifications. The timeline of these is shown in the figure above. One month after the study began, rotating modules were introduced (shown in the figure above in green). These came in just for a week.

The full measures and data dictionary for the study is shown in the Appendix.

### 3.2 Validated measurements and scales

**Anxiety** during the past week was measured using the Generalised Anxiety Disorder assessment (GAD-7); a well-validated tool used to screen and diagnose generalised anxiety disorder in clinical practice and research <sup>1</sup>. There are 7 items with 4-point responses ranging from “not at all” to “nearly every day”, with higher overall scores indicating more symptoms of anxiety. Categorical scales suggest that scores of higher than 5 are mild, higher than 10 are moderate, and higher than 15 are severe <sup>1</sup>.

**Coping** during lockdown was measured using the 28-item Brief COPE <sup>2</sup> scale; one of the most widely used measures to assess the different ways in which people respond to stress. Responses are rated on a 4-point scale from “I haven’t been doing this at all” to “I have been doing this a lot”. Construct validity and internal reliability of its various 14 subscales have been demonstrated in associations with constructs such as social support <sup>3</sup>, mental illness symptom severity <sup>4</sup>, and psychological symptomatology <sup>5</sup>.

**Coronavirus anxiety** during the past two weeks was measured using the Coronavirus Anxiety Scale (CAS) <sup>6</sup>. The CAS contains 5 items with 5-point responses ranging from “not at all” to “nearly every day”. The scale has shown good internal reliability (Cronbach’s  $\alpha = 0.93$ ), construct validity, diagnostic viability, and equivalency of measurement across demographic groups <sup>6</sup>. A CAS score of 9 or more classified adults as meeting (90% sensitivity) or not meeting (85% specificity) the threshold for Generalised Anxiety Disorder as a result of worries about Coronavirus <sup>6</sup>.

**Creative activities.** Use of emotion regulation strategies whilst engaging in creative activities during the past week was measured with the 18-item Emotion Regulation Strategies for Artistic Creative Activities Scale (ERS-ACA) <sup>7</sup>. Items are rated on 5-point scale ranging from “strongly disagree” to “strongly agree”. An overall general factor alongside three subscales can be used: ‘avoidance strategies’ (7 items such as distraction, suppression and detachment), ‘approach strategies’ (6 items such as acceptance, reappraisal and problem solving), and ‘self-development strategies’ (5 items such

as enhanced self-identify, improved self-esteem and increased agency). Strong internal consistency (Cronbach's alphas = 0.88 to 0.93), convergent and divergent validity, construct validity, consistency of internal reliability, and test-retest reliability have been demonstrated <sup>7</sup>.

**Depression** during the past week was measured using the Patient Health Questionnaire (PHQ-9); a standard instrument for diagnosing depression in primary care <sup>8</sup>. The questionnaire involves nine items, with responses ranging from "not at all" to "nearly every day". Higher overall scores indicate more depressive symptoms, with scores of 0-4 suggesting minimal depression, 5-9 suggesting mild depression, 10-14 suggesting moderate depression, 15-19 suggesting moderately severe depression, and scores of 20-27 suggesting severe depression <sup>9</sup>.

**Discrimination** experiences since the lockdown were adapted from the Everyday Discrimination Scale (EDS) <sup>10</sup> which was designed to measure routine and relatively subtle experiences of unfair treatment in everyday situations. The scale is widely used and has shown good internal reliability (Cronbach's  $\alpha$  = 0.87) and expected associations with internalising and externalising symptoms <sup>11</sup>. We used three items from the short version of the EDS (being threatened or harassed; treated as if you are dishonest; people acting as if they were afraid of you) and added four questions from the English Longitudinal Study of Ageing. We made subtle changes to some of the phrasing to account of the unique social situation of COVID-19. For example, the item "received poorer service in restaurants or stores" was changed to "received poorer service than other people (e.g. for deliveries or in stores)", and an item about receiving poorer service than others from doctors or in hospitals was added. Participants who said they had had each experience were asked to give one of four possible reasons (gender, race/ethnicity, age, for another reason) for the discrimination.

**Empathy** was assessed using the Interpersonal Reactivity Index (IRI) <sup>12</sup>. The IRI is a widely used measure comprised of four subscales; fantasy, empathic concern, perspective-taking, and personal distress. The COVID-19 Social Study administered the latter two subscales. Empathic concern (also known as emotional empathy) consists of 7 items and captures feelings of warmth, concern, and compassion for others. The perspective-taking scale (also known as cognitive empathy) assesses efforts to adopt the perspectives of others (7 items). Respondents rate items on a five-point scale ranging from "does not describe me well" to "describes me very well". Adequate test-retest and internal reliabilities <sup>12</sup> as well as convergent and discriminant validity <sup>13</sup> have been reported.

**Life events** in the 12 months prior to lockdown (March 2019 to March 2020) were measured with an item from the Life History Interview of the English Longitudinal Study of Ageing <sup>14</sup>. Participants were presented with a list of 11 life events. The extent to which they found endorsed events distressing was then rated on a four-point scale ranging from "yes, it upset me very much" to "yes, but it didn't upset me at all".

**Locus of control** was measured using the 6-item Locus of Control Scale developed by the University of Washington Beyond High School Project <sup>15</sup>. The scale was based on Rotter's <sup>16</sup> conceptualisation of locus of control as generalized expectancies for whether individuals can (internal) or cannot (external) control events and outcomes in their lives. Responses were rated on a four-point scale ranging from "strongly agree" to "strongly disagree".

- In my life, good luck is more important than hard work for success
- When I make plans, I am almost certain I can make them work

- Every time I try to go ahead, something or somebody stops me
- My plans hardly ever work out, so planning makes me unhappy
- I do not have enough control over the direction my life is taking
- Chance and luck are very important for what happens in my life

**Loneliness** was measured using the 3-item UCLA-3 Loneliness, a short form of the Revised UCLA Loneliness Scale (UCLA-R) <sup>17(p198)</sup>. Each item is rated with a 4-point rating scale, ranging from “never” to “always”, with higher score indicating greater loneliness.

**Neighbourhood** social cohesion before and since COVID-19 was measured with the Neighbourhood Scale <sup>18</sup>. Five items were rated on a five-point scale ranging from “strongly disagree” to “strongly agree”. The social cohesion scale has demonstrated good internal reliability (Cronbach’s alpha = 0.74) and test-retest reliability ( $r = 0.65$ ) <sup>18</sup>. Good convergent validity has also been found in correlations in the expected direction with neighbourhood safety ( $r = 0.72$ ) and activities with neighbours ( $r = 0.43$ ) <sup>18</sup>.

**Optimism** was measured with the widely-used Life Orientation Test- Revised (LOT-R) <sup>19</sup>. Ten items are rated on a five-point scale ranging from “strongly disagree” to “strongly agree”. The LOT-R has demonstrated good internal consistency (Cronbach’s alphas ranging from 0.70 to 0.80) and test-retest reliability (correlations from 0.68 to 0.79) <sup>19</sup>. Convergent validity has been shown in correlations with depression, life satisfaction, and health care utilisation <sup>20</sup>.

**Personality** was measured using the Big Five Inventory (BFI-2), which measures five domains and 15 facets: Extraversion (sociability, assertiveness, and energy level), Agreeableness (compassion, respectfulness, and trust), Conscientiousness (organisation, productiveness, and responsibility), Nervousness (anxiety, depression, and emotional volatility), and Openness (intellectual curiosity, aesthetic sensitivity, and creative imagination) <sup>21</sup>. Each item uses a 5-point scale ranging from “strongly disagree” to “strongly agree”, with higher score indicating greater levels of each domain.

**Religion and spirituality** was measured with items from the English Longitudinal Study of Ageing <sup>22</sup>. Participants were first asked to which religion they belonged from a list of eight (e.g., Christian, Jewish, Sikh), including no religion and “other”. A second question asked about the frequency of religious service attendance during the past year before the COVID-19 pandemic on a 5-point scale from “not at all” to “more than once a week”. A further 4 items asked participants about the role of religion and spirituality in their lives (e.g. “I pray or meditate daily”). These items were rated on a 4-point scale from “strongly disagree” to “strongly agree”.

**Resilience** was assessed with the 6-item Brief Resilience Scale <sup>23</sup>; a widely used measure of individuals’ ability to recover from stress. Items are rated on a five-point scale from “strongly disagree” to “strongly agree”. Initial psychometrics were established using four samples of adults <sup>23</sup>. The scale was found to have good internal reliability (Cronbach’s alphas = .80–.91), and convergent and discriminate validity in associations in expected directions with other resilience measures, optimism, purpose in life, anxiety, and depression <sup>23</sup>.

**Risk taking** was measured with one item from the Dohmen Risk Taking Scale <sup>24</sup>. Respondents rated the extent to which they generally see themselves as a person who is fully prepared to take risks was

rated on an 11-point scale from “not at all willing to take risks” to “very willing to take risks”. Behavioural validity was established using a laboratory-based task involving a choice between a safe or a riskier lottery option to win money <sup>24</sup>.

**Social support** was measured using an adapted version of the six-item short form of Perceived Social Support Questionnaire (F-SozU K-6) <sup>25,26</sup>. Each item is rated on a 5-point scale from “not true at all” to “very true”, with higher scores indicating higher levels of perceived social support. Minor adaptations were made to the language in the scale to make it relevant to experiences during COVID-19.

Comparison of items in the original and revised Perceived Social Support Questionnaire (F-SozU K-6).

Original	Adapted for COVID-19 In the past week, I feel...
I experience a lot of understanding and security from others	I have experienced a lot of understanding and support from others
I know a very close person whose help I can always count on	I have a very close person whose help I can always count on
If necessary, I can easily borrow something I might need from neighbours or friends	If necessary, I can easily borrow something I need from neighbours or friends
I know several people with whom I like to do things	I have people with whom I can spend time and do things together
When I am sick, I can without hesitation ask friends and family to take care of important matters for me	If I get sick, I have friends and family who will take care of me
If I am down, I know to whom I can go without hesitation	If I am feeling down, I have people I can talk to without hesitation

**Vaccines.** Attitudes towards vaccines were measured using the 12-item Vaccination Attitudes Examination (VAX) Scale <sup>27</sup>. Participants were asked to focus on vaccines in general rather than specifically on vaccines for COVID-19. Response options ranged from 1 “strongly agree” to 6 “strongly disagree.” Four subscales have previously been derived from the VAX; 1) mistrust of vaccine benefit, (2) worries about unforeseen future effects, (3) concerns about commercial profiteering, and (4) preference for natural immunity <sup>27</sup>. Adequate convergent validity and internal reliability was established for all 4 subscales in two samples (Cronbach’s alphas = 0.77-0.93).

**Wellbeing** during the past week using the Subjective Wellbeing measure from the Office for National Statistics <sup>28</sup>. Three questions were asked; 1) life satisfaction, 2) worthwhileness, and 3) happiness. Each item is rated on an 11-point scale from 0 (not at all) to 10 (completely).

### 3.3 Derived variables

In addition to the time variables, date, wave and week, other derived variables are also available in the dataset. These include:

- female
- Ethnic minorities (binary ethnicity variable)

- age (derived from year of birth, capped at 90)
- agegrp3 (age dichotomized into 3 groups)
- agegrp4 (age dichotomized into 4 groups)
- edu (derived from education, 3 groups)
- lowincome (household income<30k)
- overcrowd (room per person<1)
- alone (binary variable indicating if living alone)
- status (living status)
- employed (binary variable, derived from 'employment')
- keyworker
- carer
- ltc\_p (binary indicator—diagnosed physical condition)
- ltc\_m (binary indicator—diagnosed mental condition)
- ltc\_none (binary indicator—no physical or mental condition)
- GAD (sum score of the GAD-7 scale)
- anxi (binary, GAD≥10)
- PHQ (sum score of the PHQ-9 scale)
- depress (binary PHQ≥10)
- lonely (sum score of the UCLA-3 scale)
- support (sum score of perceived social support)
- BFI\_n (sum score of the BFI-15, neuroticism)
- BFI\_e (sum score of the BFI-15, extraversion)
- BFI\_o (sum score of the BFI-15, openness to experience)
- BFI\_a (sum score of the BFI-15, agreeableness)
- BFI\_c (sum score of the BFI-15, conscientiousness)
- CAS (sum score of the Coronavirus Anxiety Scale)
- RES (sum score of the resilience scale)
- COP\_dis (Self-distraction (sum score of cop1 & cop19))
- COP\_act (Active coping (sum score of cop2 & cop7))
- COP\_den (Denial (sum score of cop3 & cop8))
- COP\_sub (Substance use (sum score of cop4 & cop11))
- COP\_emo (Emotional support (sum score of cop5 & cop15))
- COP\_ins (Instrumental support (sum score of cop10 & cop23))
- COP\_beh (Behavioral disengagement (sum score of cop6 & cop16))
- COP\_ven (Venting (sum score of cop9 & cop21))
- COP\_pos (Positive reframing (sum score of cop12 & cop17))
- COP\_pla (Planning (sum score of cop14 & cop25))
- COP\_hum (Humor (sum score of cop18 & cop28))
- COP\_acp (Acceptance (sum score of cop20 & cop24))
- COP\_rel (Religion (sum score of cop22 & cop27))
- COP\_sbm (Self-blame (sum score of cop13 & cop26))

### 3.4 Missing data

Our study required completion of every question on every page for participants to proceed, so there are generally no missing items in any measures. The exceptions to this are some of the revolving modules where particularly sensitive questions were made optional, and incomplete records, whereby people who started a weekly survey and then were unable to complete it for any reason did not provide data across all the measures.

## Data Dictionary

### Section 1: Baseline Only

Variable name	Question/variable label	Choices/label values
sex	What is your gender?	1, Male 2, Female 3, Other / prefer not to say
ethnicity	What is your ethnicity?	1, Asian/Asian British - Indian, Pakistani, Bangladeshi, other 2, Black/Black British - Caribbean, African, other 3, Mixed race - White and Black/Black British 4, Mixed race - other 5, White - British, Irish, other 6, Chinese/Chinese British 7, Middle Eastern/Middle Eastern British - Arab, Turkish, other 8, Other ethnic group 9, Prefer not to say
marital	What is your relationship status?	1, Single, never married 2, Single, divorced or widowed 3, In a relationship/married but living apart 4, In a relationship/married and cohabiting

education

What is your highest level of educational attainment?

- 1, No qualifications
- 2, Completed GCSE/CSE/O-levels or equivalent (at school till aged 16)
- 3, Completed post-16 vocational course
- 4, A-levels or equivalent (at school till aged 18)
- 5, Undergraduate degree or professional qualification
- 6, Postgraduate degree

employment

What is your employment status?

- 1, Still at school
- 2, At university
- 3, Self employed
- 4, In part-time employment
- 5, In full-time employment
- 6, Unable to work due to disability
- 7, Homemaker/full-time parent
- 8, Unemployed and seeking work
- 9, Retired

keyworker	Are you currently fulfilling any of the government's identified 'key worker' roles?	1, Health, social care or relevant related support worker 2, Teacher or childcare worker still travelling in to work 3, Transport worker still travelling in to work 4, Food chain worker (e.g. production, sale, delivery) 5, Key public services worker (e.g. justice staff, religious staff, public service journalist or mortuary worker) 6, Local or national government worker delivering essential public services 7, Utility worker (e.g. energy, sewerage, postal service) 8, Public safety or national security worker 9, Worker involved in medicines or protective equipment production or distribution 10, None of these
country	In which country do you currently live?	1, England 2, Wales 3, Scotland 4, Northern Ireland 6, The USA 5, Other
area	What type of area do you live in?	1, City 2, Large town 3, Small town 4, Village 5, Hamlet 6, Isolated dwelling

living	What type of place do you live?	1, House 2, Room(s) in shared house (e.g. as a lodger) 3, Flat in flat block 4, Student halls 5, Residential home 6, Other
ownership	Which describes the home you live in?	1, Owned outright 2, Owned with the help of a mortgage 3, Shared ownership (part owned, part rented) 4, Rented 5, Living rent free
garden	Do you have access to any the following where you live?	1, A garden 2, A balcony, small patio, or roof terrace 3, A park, wood, or other green space you can still access within easy walking distance of your home 4, none of the above
rooms	How many rooms are in your home? (not including any bathrooms or toilets. If you live in a shared house only count the rooms that are open to you to use. If you live in a block of flat, only count rooms your flat.)	1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7   8, 8   9, 9   10, 10+
	How many adults are living WITH YOU in the household?	
houseadults	(Do not count yourself)	0, 0   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7   8, 8   9, 9   10, 10+
	"Household" means the people you immediately live with, e.g. in your flat or house. Don't count other people e.g. in your flat block.	

housechildren	How many children are living with you in the household?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10+
income	What is your usual total household income?	1, Less than £16,000 a year (£310 a week) 2, £16,000-£29,999 a year (£310 - £579 a week) 3, £30,000-£59,999 a year (£580 - £1149 a week) 4, £60,000-89,999 a year (£1500 - £1729 a week) 5, £90,000-119,999 a year (£1730 - £2299 a week) 6, More than £120,000 a year (£2300 a week) 7, Prefer not to say
illness	"Household income" means the money brought in by you and/or your spouse and/or another adult you live with, with whom you share finances. Don't count the income from anybody whose finances are independent of yours.  Do you have any of the following medical conditions?	1, High blood pressure 2, Diabetes 3, Heart disease 4, Lung disease (e.g. asthma or COPD) 5, Cancer 6, Another clinically-diagnosed chronic physical health condition 7, Clinically-diagnosed depression 8, Clinically-diagnosed anxiety 9, Another clinically-diagnosed mental health problem 12, A disability that affects my ability to leave the house 13, Any other disability 10, I am pregnant 11, None of the above

smoker	Do you smoke?	1, non-smoker 2, ex-smoker 3, current light smoker (9 or less a day) 4, current moderate smoker (10-19 a day) 5, current heavy smoker (20+ a day)
alcohol	How many alcoholic drinks have you had in the past week (e.g. how many glasses of wine / pints of beer or cider / shots of spirits)?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10 11, 11 12, 12 13, 13 14, 14 15, 15 16, 16 18, 18 19, 19 20, 20 21, 21+
exercise	How many days last week did you do moderate or vigorous physical activity (activity that raises your heart rate and makes you breathe faster and feel warmer) for 15 minutes or more?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7
caring	Do you have caring responsibilities for any of the following? (tick any that apply)	1, Elderly relatives or friends 2, People with long-term conditions or disabilities 3, Grandchildren
pets	Do you have any of the following pets? (tick any that apply)	1, Cat 2, Dog 3, Bird 4, Fish 5, Other
closefriends	How many close friends do you have?	0, 0 1, 1 2, 2 3, 3 4, 4 5, 5 6, 6 7, 7 8, 8 9, 9 10, 10+
socfreq	Usually in your life, how often do you meet up with people face to face socially, not for work (e.g. friends, family, relatives or social events with colleagues)?	1, Every day 2, Three or more times a week 3, Once or twice a week 4, Once or twice a month 5, Less than once a month

pers1	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...worries a lot</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>
pers2	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...gets nervous easily</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>
pers3	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...remains calm in tense situations</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>
pers4	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...is talkative</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>

pers5	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...is outgoing, sociable</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>
pers6	<p>Your personality</p> <p>I see myself as someone who:</p> <p>...is reserved</p>	<p>1, Strongly disagree</p> <p>2, Disagree</p> <p>3, Somewhat disagree</p> <p>4, Neither agree nor disagree</p> <p>5, Somewhat agree</p> <p>6, Agree</p> <p>7, Strongly agree</p>

---

## Section 2: Questions asked weekly

Variable name	Question/variable label	Choices/label values
covid	Have you had Covid-19 (coronavirus)? (21/03/2020-11/09/2020)	1, Yes diagnosed and recovered 2, Yes diagnosed and still ill 3, Not formally diagnosed but suspected 4, Not that I know of / No
covidtest	Overall, do you believe you have ever had Covid-19? (24/08/2020-29/09/2020)	1, Yes, confirmed by a positive Covid-19 test at the time I felt ill 2, Yes, confirmed by a positive antibody test since that shows I have the antibodies to the virus 3, Yes, suspected by a doctor but not tested 4, Yes, my own suspicions 5, No, not that I know of
covidw	In the past month, have you had Covid-19 (coronavirus)? (24/08/2020-)	1, Yes diagnosed and recovered 2, Yes diagnosed and still ill 3, Not formally diagnosed but suspected 4, Not that I know of / No
covidcontact	In the last week, do you believe you have come into CLOSE CONTACT with somebody who has Covid-19 (e.g. living with, hugging, shaking hands with, or spending more than 15 minutes with)?	1, No 2, Yes 3, Unsure
isolationstatus	What is your current isolation status? (tick any that apply)  By "staying at home" we mean avoiding leaving the house for everything apart from exercise, shopping for essentials, or medical need.  By "self-isolating" we mean staying at home and avoiding contact with any people inside or outside the household.	1, I am living my life as normal 2, I am not "staying at home", but I have cut down on my usual activities as a precaution 3, I am not "staying at home" specifically, but I have stopped going to work like normal and am working from home 6, I am "staying at home" because I have an existing medical condition or am categorised as high risk

4, I am "staying at home" as I am worried about spreading it to others or getting ill (but I am not high risk)

5, I am "staying at home" to protect a family member, friend or housemate who has an existing medical condition / is high risk

8, I am "staying at home" as it has been ordered by the government or local authority as part of a lock down

9, I am "staying at home" but this is NOT because of Covid-19 but because of another reason e.g. a pre-existing health condition or disability

7, I am "self-isolating" (avoiding contact with all people as much as I can) due to a diagnosis of Covid-19 or possible infection

isolation\_new

What is your current isolation status?

- 1, I am in full isolation, not leaving my home at all
- 2, I am staying at home, only leaving for exercise, food shopping, accessing medication, or essential activity permitted by government guidelines
- 3, I am staying at home, only leaving for exercise, food shopping or accessing medication AND work OR other essential task (e.g. volunteering)
- 4, I am NOT following the stay-at-home recommendations but am adhering to social distancing when in public (e.g. staying 2m away from others)
- 5, I am NOT following the stay-at-home recommendations or social distancing when I am out
- 6, I am leaving the house for more reasons than those listed above but am adhering to social distancing in public (e.g. staying 2m away from others)
- 7, I am leaving the house for more reasons than those listed above and am NOT adhering to social distancing in public (e.g. staying 2m away from others)

leavinghome

In the past week, which of these have you left your home for?  
[NB some of these activities may not yet be allowed in different UK nations]

- 1, Exercise
- 2, Buying food or medication
- 3, Other shopping
- 4, Other errands (e.g. taking a child to school)
- 5, Work
- 6, Other essential task (e.g. volunteering)
- 7, Visiting people in a support bubble
- 8, Meeting up with friends or family (not in a support bubble)
- 9, Going out for meals or entertainment
- 10, Day trip or other outing
- 11, Other reason
- 12, I am not leaving my home

isolation\_reason

What are the motivations for your current isolation status above? (please tick all that apply)

- 1, I am worried about catching Covid-19 and I have an existing medical condition or am categorised as high risk
- 2, I am worried about catching Covid-19 but am not high risk
- 3, I wish to protect/shield a family member/friend who is high risk
- 4, I am worried about spreading Covid-19 to others
- 5, It has been ordered by the government (e.g. as part of lockdown)
- 6, Another reason not relating to Covid-19 (e.g. maternity leave, pre-existing illness, or disability)
- 7, None of the above

life_diff	How different has life been for you in the past week compared to life before Covid-19?	1, Entirely the same as usual 2, Only a little different 3, Quite a few differences 4, Lots of differences 5, Completely different
daysisolating	In the past 7 days, how many days have you: not left the house or garden?	0, 0   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7
daysoutside	In the past 7 days, how many days have you: been outside for 15 minutes or more (including on a balcony or in the garden)?	0, 0   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7
daysface	In the past 7 days, how many days have you: had face-to-face contact with another person for 15 minutes or more (including someone you live with)?	0, 0   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7
dayscall	In the past 7 days, how many days have you: had a phone or video call with another person for 15 minutes or more?	0, 0   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7
sleep	Over the past week, how has your sleep been?	1, Very good 2, Good 3, Average 4, Not good 5, Very poor
smokechange	Over the past week have you smoked more than usual?	1, Less than usual 2, About the same 3, More than usual 4, I don't smoke
alcoholchange	Over the past week have you drunk alcohol more than usual?	1, Less than usual 2, About the same 3, More than usual 4, I don't drink alcohol
foodchange_2	Over the past week have you eaten more than usual?	1, Less than usual 2, About the same 3, More than usual
dietchange_3	Over the past week how has your diet been?	1, Less healthy than usual 2, About the same healthiness as usual 3, More healthy than usual

onssat	Overall, in the past week, how satisfied have you been with your life?	0, 0 - not at all   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7   8, 8   9, 9   10, 10 - completely
onsworth	In the past week, to what extent have you felt the things you are doing in your life are worthwhile?	0, 0 - not at all   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7   8, 8   9, 9   10, 10 - completely
onshappy	In the past week, how happy did you feel?	0, 0 - not at all   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7   8, 8   9, 9   10, 10 - completely
covidknowledge	How would you rate your knowledge level on Covid-19?	1, 1 - very poor knowledge   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 - very good knowledge
followingisolation	Are you following the recommendations from authorities to prevent spread of Covid-19?	1, 1 - not at all   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 - very much so
confidencegov	How much confidence do you have in the UK GOVERNMENT that they can handle Covid-19 well?  If you live in a devolved nation, we ask you to focus on the government within your country (e.g. the Scottish government / Welsh government / Northern Ireland Executive)	1, 1 - None at all   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 - Lots
confidencegov_central	How much confidence do you have in the CENTRAL UK GOVERNMENT that they can handle Covid-19 well? [Please answer this question about the government in Westminster, even if you live in a devolved nation]	1, 1 - None at all   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 - Lots
confidencegov_devolved	If you live in a DEVOLVED NATION (i.e. Scotland, Wales or NI), how much confidence do you have in the government WITHIN YOUR OWN COUNTRY that they can handle Covid-19 well? (e.g. the Scottish government / Welsh government / Northern Ireland Executive) [NB you have already told us which country you live in]	1, 1 - None at all   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 – Lots   8, Not applicable - I live in England

confidencehealth	<p>How much confidence do you have that the UK HEALTH SERVICE can cope during Covid-19?</p> <p>If you live in a devolved nation, we ask you to focus on the health service within your country (e.g. NHS Health Scotland / NHS Wales / HSCNI)</p>	1, 1 - None at all   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 - Lots
confidenceessent	How much confidence do you have that ESSENTIALS (e.g. access to food, water, medicines, deliveries) will be maintained during Covid-19?	1, 1 - None at all   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 - Lots
adverse	Have you experienced any of the following in the past week?	<p>1, Lost your job / been unable to do paid work</p> <p>2, Your spouse/partner lost their job or was unable to do paid work</p> <p>10, Major cut in household income (e.g. due to you or your partner being furloughed / put on leave / not receiving sufficient work)</p> <p>3, Unable to pay bills / rent / mortgage</p> <p>4, Evicted / lost accommodation</p> <p>5, Unable to access sufficient food</p> <p>6, Unable to access required medication</p> <p>7, Somebody close to you is ill in hospital (due to Covid-19 or another illness)</p> <p>8, You lost somebody close to you (due to Covid-19 or another cause)</p> <p>9, None of the above</p>
phq1	<p>Over the last week, how often have been bothered by:</p> <p>Little interest or pleasure in doing things</p>	<p>1, Not at all</p> <p>2, One or two days</p> <p>3, More than half the days</p> <p>4, Nearly every day</p>

phq2	Over the last week, how often have been bothered by:  Feeling down, depressed, or hopeless	1, Not at all 2, One or two days 3, More than half the days 4, Nearly every day
phq3	Over the last week, how often have been bothered by:  Trouble falling/staying asleep, sleeping too much	1, Not at all 2, One or two days 3, More than half the days 4, Nearly every day
phq4	Over the last week, how often have been bothered by:  Feeling tired or having little energy	1, Not at all 2, One or two days 3, More than half the days 4, Nearly every day
phq5	Over the last week, how often have been bothered by:  Poor appetite or overeating	1, Not at all 2, One or two days 3, More than half the days 4, Nearly every day
phq6	Over the last week, how often have been bothered by:  Feeling bad about yourself or that you are a failure or have let yourself or your family down	1, Not at all 2, One or two days 3, More than half the days 4, Nearly every day
phq7	Over the last week, how often have been bothered by:  Trouble concentrating on things, such as reading the newspaper or watching television	1, Not at all 2, One or two days 3, More than half the days 4, Nearly every day
phq8	Over the last week, how often have been bothered by:  Moving or speaking so slowly that other people could have noticed. Or the opposite; being so fidgety or restless that you have been moving around a lot more than usual	1, Not at all 2, One or two days 3, More than half the days 4, Nearly every day

phq9	Over the last week, how often have been bothered by:	1, Not at all
	Thoughts that you would be better off dead or of hurting yourself in some way	2, One or two days 3, More than half the days 4, Nearly every day
harm1	Over the last week, how often have been bothered by:	1, Not at all
	Self-harming or deliberately hurting yourself	2, One or two days 3, More than half the days 4, Nearly every day
harm2	Over the last week, how often have been bothered by:	1, Not at all

Vaccine module		
vax1	I feel safe after being vaccinated	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax2	I can rely on vaccines to stop serious infectious diseases	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax3	I feel protected after getting vaccinated	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax4	Although most vaccines appear to be safe, there may be problems that we have not yet discovered	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax5	Vaccines can cause unforeseen problems in children	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree

vax6	I worry about the unknown effects of vaccines in the future	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax7	Vaccines make a lot of money for pharmaceutical companies, but do not do much for regular people	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax8	Authorities promote vaccination for financial gain, not for people's health	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax9	Vaccination programs are a big con	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax10	Natural immunity lasts longer than a vaccination	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax11	Natural exposure to viruses and germs gives the safest protection	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
vax12	Being exposed to diseases naturally is safer for the immune system than being exposed through vaccination	1, 1 - Strong agree   2, 2   3, 3   4, 4   5, 5   6, 6 - Strongly disagree
fluvaccine_past	Did you receive an influenza (flu) vaccine in the last year?	1, Yes   2, No   3, I don't remember
refusedvaccine	Have you ever refused or elected to forego a doctor-recommended vaccine for you or someone you are responsible for (e.g. your child)?	1, Yes   2, No
fluvaccine_plan	How likely to do you think you are to get a flu vaccine this year?	1, 1 - Very unlikely   2, 2   3, 3   4, 4   5, 5   6, 6 - Very likely
covidvaccine_plan	How likely to do you think you are to get a COVID-19 vaccine when one is approved?	1, 1 - Very unlikely   2, 2   3, 3   4, 4   5, 5   6, 6 - Very likely
<hr/>		
followingisolation_others	On average, to what extent do you think THE REST OF THE POPULATION is following the recommendations from authorities to prevent spread of Covid-19?	1, 1 - not at all   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7 - very much so

## Compliance Module

Some people have altered their behaviour since the beginning of the pandemic in response to government rules and guidelines, while others have continued to pursue their usual activities. Some may have wanted to change their behaviour but have not been able to do so for different reasons. Some may have changed their behaviour, but haven't been able to do this consistently. We'd like to find out about your behaviours. Below we ask some questions and give you the space to provide detail on the reasons for your choices.

	IN THE LAST 7 DAYS, to what extent have you been following the behaviours below:	
Compl1	Washing your hands thoroughly with soap and water or using hand sanitising gel after any possible contact with other people outside of your household or shared surfaces	1, Never   2, Rarely   3, Occasionally   4, Frequently   5, Always   9, Not applicable
compl2	IN THE LAST 7 DAYS, to what extent have you been following the behaviours below: Wearing a face mask or other face covering where it is currently recommended	1, Never   2, Rarely   3, Occasionally   4, Frequently   5, Always   9, Not applicable
compl3	IN THE LAST 7 DAYS, to what extent have you been following the behaviours below: Maintaining the recommended distance from people not in your household/bubble	1, Never   2, Rarely   3, Occasionally   4, Frequently   5, Always   9, Not applicable
compl4	IN THE LAST 7 DAYS, to what extent have you been following the behaviours below: Meeting up with MORE THAN the recommended number of people from other households OUTDOORS	1, Never   2, Rarely   3, Occasionally   4, Frequently   5, Always   9, Not applicable
compl5	IN THE LAST 7 DAYS, to what extent have you been following the behaviours below: Meeting up with MORE THAN the recommended number of people from other households INDOORS	1, Never   2, Rarely   3, Occasionally   4, Frequently   5, Always   9, Not applicable
compl6	IN THE LAST 7 DAYS, to what extent have you been following the behaviours below: Following other rules relevant to the tier or level of lockdown currently active in your area	1, Never   2, Rarely   3, Occasionally   4, Frequently   5, Always   9, Not applicable
comp_test	Since the start of first lockdown back in March, if you developed symptoms of Covid-19 [a cough/fever/loss of taste or smell], have you requested a test?	1, No never   2, On some occasions but not others   3, Yes every time   4, Not applicable

comp_isolate	Since the start of first lockdown back in March, if you developed symptoms of Covid-19 [a cough/fever/loss of taste or smell], how many days did you stay at home for? *If this has happened more than once, please provide details of the shortest time you stayed at home for. If not applicable, you can skip this question.	0, 0   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7   8, 8   9, 9   10, 10   11, 11   12, 12   13, 13   14, 14   15, 15   16, 16   17, 17   18, 18   19, 19   20, 20   21, 21+   22, Not applicable
comp_isolate2	Since the start of first lockdown back in March, if you were told you had come into contact with somebody else who developed symptoms of Covid-19, how many days did you stay at home for? *If this has happened more than once, please provide details of the shortest time you stayed at home for. If not applicable, you can skip this question.	0, 0   1, 1   2, 2   3, 3   4, 4   5, 5   6, 6   7, 7   8, 8   9, 9   10, 10   11, 11   12, 12   13, 13   14, 14   15, 15   16, 16   17, 17   18, 18   19, 19   20, 20   21, 21+   22, Not applicable
<hr/>		
Finance module (repeated)		
<hr/>		
Financesupport_le_2	Have you used any of the following SINCE THE START OF AUGUST?	1, Foodbanks 2, Donations of food or clothing or other essentials 3, Furlough payments through your work 4, Self-employed income support 5, Universal credit 6, Pension credit 7, Housing benefit 8, Council tax support/reduction 9, Business support (e.g. business loans) 10, Bank loans 11, Mortgage holiday or other mortgage freeze 12, Deferred VAT or income tax payments 13, Insurance claims 14, Sick pay 15, Loans or other financial help from family or friends 16, Other financial support 17, None of the above
<hr/>
